# Module 3: Planning with Core Learning Cycles: 0-36 Months

#### **Learning Cycles**

Plan Your Week books are structured around
\_\_\_\_\_\_ Learning Cycles as well as Theme-based
Learning Cycles for 12-36 months.

## **Core Learning Cycles**

For 0-6, 6-12, and 12-24 months the Core Learning Cycle is a total of \_\_\_\_\_ weeks long.

For 24-36 Months, there are \_\_\_\_\_ Core Learning Cycles: Core Cycle A and Core Cycle B. Both Core Cycles are four weeks long and are designed to be used consecutively, for a total of weeks.

The core cycle is designed to be repeated again and again.

How long can you use the Core Learning Cycle?

#### Planning with the Curriculum

Weekly lesson planning is an important aspect of effective teaching and learning. Planning provides you the opportunity to purposefully think about each part of your day and determine what will happen during those times.

As you plan it is important to keep each child's individual needs in mind. You can do this by using three sources of information:

- Infant and Toddler Developmental Milestones Checklists
- Feedback from \_\_\_\_\_\_
- \_\_\_\_\_ notes

### **Overview of Planning Steps**

Where can you find the Steps for Lesson Planning?
