

CIRCLE

Infant & Toddler Specialist Toolkit

WELCOME!

With support from the Texas Workforce Commission and multiple private foundations, the Children's Learning Institute at The University of Texas Health Science Center has developed a broad range of resources to support teachers and caregivers of children from birth to three. These resources are available at **no cost** through the CLI Engage platform (cliengage.org). This toolkit is designed to give specialists who work with infant and toddler teachers an introduction to these resources, as well as ideas for incorporating them into their programs.

LEVELS OF SUPPORT

We understand that every agency and program has different capacities and approaches for supporting infant and toddler teachers. This toolkit is organized to demonstrate how CLI Engage resources can be implemented in varying levels of support, including basic outreach and dissemination, check-in calls ("light intensity"), group-based facilitated workshops ("medium intensity"), and targeted one-to-one coaching ("high intensity").

TRAINING

The CIRCLE Infant & Toddler Specialist Training is designed for specialists who would like an introduction to the resources on CLI Engage and to explore how these resources can be used in their programs. Please keep in mind that the activities presented in the training are designed to help attendees become familiar with the resources and are not intended to be recreated in trainings with infant and toddler teachers. Our goal is to provide a foundation for you to feel comfortable further exploring CLI Engage resources and adapting their delivery to fit the needs and mission of your program.
